

KOMURA INTERCHANGEABLE LENSES

- *Superbly Sharp—for Color and Black and White Photography*
- *40 lenses—from 28mm to 800mm*
- *For Most Reflex, Rangefinder-coupled, and C-mount Cameras*

Komura lenses offer high speed, superb sharpness and definition that meets the most critical demands of color and black and white photography. Lightweight, rugged construction, and simplified click-stop aperture settings contribute to their ease and convenience of use.

All Komura lenses from 28mm f3.5 to 200mm f4.5 couple directly to the camera. Lenses from 200mm f3.5 to 800mm f8 require adapters. This unique adapter feature significantly decreases inventory requirements, as the Dealer can now meet the lens needs of any customer, no matter what camera he owns, with just a basic stock of Komura lenses.

Komura lenses from 28mm to 800mm are also available in mounts to fit cameras with Leica—thread mounts.

In addition, there is a series of Komura lenses to fit the Bronica 2 $\frac{1}{4}$ square single lens reflex camera.

A convenient lens guide, appearing on page 4, lists every Komura lens and the cameras it will fit. The guide indicates lens product number (and corresponding adapter number where required).

KOMURA WIDE ANGLE LENSES

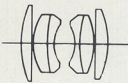

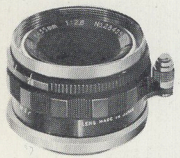

Ideal for pictures in confined areas, interiors and scenics. They provide a wider range and greater depth-of-field than normal lenses. They are made in fixed mounts to fit specific cameras.

All supplied with leather case, lens hood and cap.

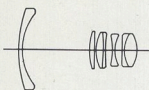

28mm f3.5 KOMURA

LN30010—Features 7 elements. 75° angle of view. Click-stops to f16. Focuses to 3.5'. Accepts 43mm screw-in filters. Fits Leica Thread Type.

35mm f2.8 KOMURA

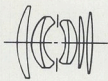

LN30021—Features 6 elements. 62° angle of view. Click-stops to F22. Focuses to 3.5'. Accepts 43mm screw-in filters. Fits Leica Thread Type.

35mm f2.5 KOMURA

Features 7 elements. 62° angle of view. Click-stops to f22. Focuses to 2'. Accepts 55mm screw-in filters.

LN30033, for Praktica LN30037, for Canon Reflex
LN30034, for Exakta LN30038, for Minolta
LN30036, for Nikon F, Nikkorex F

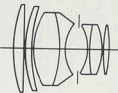

36mm f1.8 KOMURA

LN30043—Features 7 elements. 61° angle of view. Click-stops to f16. Focuses to 3.5'. Accepts 58mm screw-in filters. Fits Leica Thread Type.

TELEPHOTO LENSES

Komura Telephoto Lenses Coupling Directly to Cameras

85mm f1.4 KOMURA

Features 7 elements. 29° angle of view. Click-stops to f16. Focuses to 3.5'. 67mm screw-in filters.

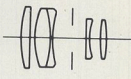

LN30060, for Praktica
LN30061, for Exakta
LN30064, for Minolta
LN30062, for Nikon F, Nikkorex F
LN30063, for Canon Reflex

105mm f2.0 KOMURA

Features 5 elements. 23° angle of view. Click-stops to f16. Focuses to 5'. 58mm screw-in filters.

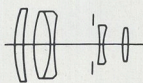

LN30086, for Praktica
LN30087, for Exakta
LN30090, for Minolta
LN30088, for Nikon F, Nikkorex F
LN30089, for Canon Reflex
LN30085, Leica Thread Type

135mm f2.3 KOMURA

Features 5 elements. 18° angle of view. Click-stops to f16. Focuses to 5'. 62mm screw-in filters.

LN30121, for Praktica
LN30122, for Exakta
LN30125, for Minolta
LN30123, for Nikon F, Nikkorex F
LN30124, for Canon Reflex

105mm f2.8 KOMURA

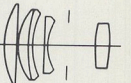

LN30071 — Features 5 elements. 23° angle of view. Click-stops to f22. Focuses to 5'. Accepts 48mm screw-in filters. Fits Leica Thread Type.

135mm f3.5 KOMURA

Features 5 elements. 18° angle of view. Click-stops to f22. Focuses to 5'. 48mm screw-in filters.

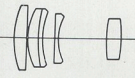

LN30098, for Praktica
LN30099, for Exakta
LN30102, for Minolta
LN30100, for Nikon F, Nikkorex F
LN30101, for Canon Reflex
LN30097, Leica Thread Type

135mm f2.0 KOMURA

Features 5 elements. 18° angle of view. Click-stops to f16. Focuses to 5'. 72mm screw-in filters.

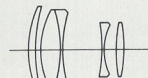

LN30132, for Praktica
LN30133, for Exakta
LN30136, for Minolta
LN30134, for Nikon F, Nikkorex F
LN30135, for Canon Reflex

105mm f2.5 KOMURA

Features 5 elements. 23° angle of view. Click-stops to f16. Focuses to 5'. 48mm screw-in filters.

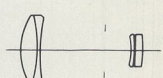

LN30075, for Praktica
LN30076, for Exakta
LN30079, for Minolta
LN30077, for Nikon F, Nikkorex F
LN30078, for Canon Reflex

135 f2.8 KOMURA

Features 5 elements. 18° angle of view. Click-stops to f22. Focuses to 5'. 55mm screw-in filters.

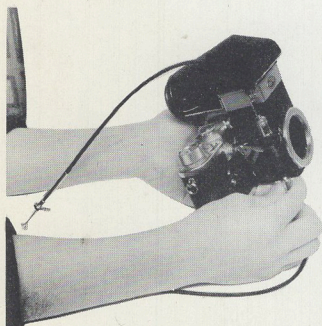

LN30110, for Praktica
LN30111, for Exakta
LN30114, for Minolta
LN30112, for Nikon F, Nikkorex F
LN30113, for Canon Reflex
LN30109, Leica Thread Type

200mm f4.5 KOMURA

Features 4 elements. 12° angle of view. Click-stops to f22. Focuses to 8'. 55mm screw-in filters.

LN30144, for Praktica
LN30145, for Exakta
LN30143, Leica Thread Type. Requires reflex housing

KOMURA REFLEX HOUSING

The Komura Reflex Housing converts rangefinder cameras such as Leica, Canon, Tower and others having an identically threaded lens flange, into an efficient single lens reflex.

The lens screws directly into the reflex housing, which then screws into the camera mount. Framing, composing, focusing and depth-of-field can all be checked in the upright image seen in the housing's ground glass. Depressing the cable release lifts the mirror out of viewing position, and fires the shutter. (See lens guide for application).

LEICA LENSES

Komura lenses to fit rangefinder cameras with Leica thread mounts. (Leica, Canon, Tower, Leotax, Nicca) are available from 28mm wide angle to 800mm telephoto. These lenses are described in detail elsewhere on this page. See lens guide (page 4) for application.

LN30010 28mm f3.5
LN30021 35mm f2.8
LN30043 36mm f1.8
LN30071 105mm f2.8
LN30085 105mm f2.0
LN30097 135mm f3.5
LN30109 135mm f2.8

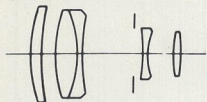

LN30143 200mm f4.5
LN30155 200mm f3.5
LN30160 300mm f5.0
LN30165 400mm f6.3
LN30170 500mm f8
LN30175 800mm f8

The telephoto lens gives you a magnified image, allows you to add detail to distant subjects, to take candid from afar, and to get portraits without risk of distortion.

Komura lenses from 200mm f3.5 to 800mm f8 require an interchangeable adapter mount. The 200mm f4.5 and all shorter focal lengths are made in fixed mounts which fit specific cameras.

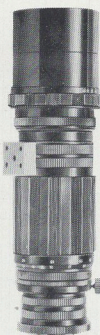

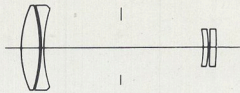

Komura Telephoto Lenses Requiring Adapters

The five Komura lenses from 200mm f3.5 to 800mm f8 fit more than thirty different make reflex cameras by means of a unique interchangeable adapter mount system. They fit rangefinder cameras having Leica thread type mounts with the Komura Reflex Housing. In addition, these lenses also fit 16mm movie cameras with "C" mounts. Lenses and adapters are listed in the lens guide on page 4.

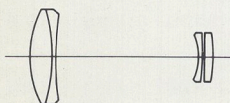

200mm f3.5 KOMURA

LN30155—Features 5 elements. 12° angle of view. Click-stops to f22. Focuses to 8'. Accepts 62mm screw-in filters.

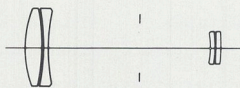

400mm f6.3 KOMURA

LN30165—Features 4 elements. 6° angle of view. Click-stops to f45. Focuses to 18'. Accepts 67mm screw-in filters.

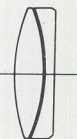

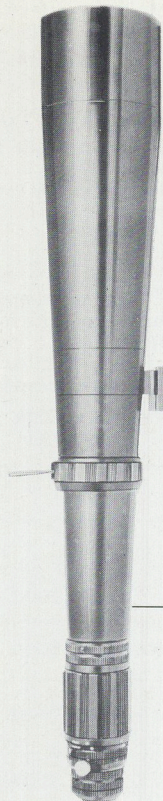

300mm f5 KOMURA

LN30160—Features 4 elements. 8° angle of view. Click-stops to f64. Focuses to 16'. Accepts 62mm screw-in filters.

500mm f7 KOMURA

LN30170—Features 4 elements. 5° angle of view. Click-stops to f64. Focuses to 26'. Accepts 77mm screw-in filters.

800mm f8 KOMURA

LN30175—Features 2 elements. 3° angle of view. Click-stops to f32. Focuses to 65'.

ADAPTERS

Komura telephoto lenses, from 200mm f3.5 to 800mm f8 use a unique interchangeable adapter system which allows them to fit a variety of 35mm reflex cameras. One end of the adapter screws on the rear of the lens, and the other fits the specified camera mount. Since many reflex cameras have similar mounts—any given Komura lens, such as the 400mm f6.3—may fit several different make 35mm cameras by the use of one adapter.

ACCESSORIES

KOMURA FILTERS

Komura filters are made of the finest optical glass. They are precision ground to plan-parallel optical flats—hard coated on both sides. The filters are the screw-in type, have front threaded rims to accept Komura screw-in lens hoods and caps.

KOMURA VIEWFINDERS

Optical viewfinders are supplied with all Leica thread type mount lenses. These lenses couple directly to the camera rangefinder.

- VF30220, for 35mm lens
- VF30221, for 105mm lens
- VF30222, for 135mm lens
- VF30223, for 200mm f4.5 lens

'C' MOUNT ADAPTER

16mm movie cameras with 'C' mounts will accept Komura lenses from 200mm f3.5 to 800mm f8 by means of special adapters. (See lens guide for application).

BRONICA LENSES

Komura lenses from 200mm f3.5 to 500mm f7 have been designed in mounts to fit the Bronica 2 1/4 square single lens reflex camera. These lenses offer the same superb optical quality, sharpness and definition as the Komura lenses for 35mm photography. They are supplied with case, lens hood, and 2 close-up extension tubes.

LN30156	—5 elements. 23° angle of view. Stops to f22. Focuses to 10'.
LN30161	—4 elements. 15° angle of view. Stops to f32. Focuses to 18'.
LN30166	—4 elements. 11° angle of view. Stops to f45. Focuses to 30'.
LN30171	—4 elements. 9° angle of view. Stops to f45. Focuses to 44'.

This chart shows the most popular single lens reflex and rangefinder-coupled cameras that each Komura lens will fit.

KOMURA LENS GUIDE

1 — TO LOCATE A LENS

a. Lenses up to 200mm (includes 200mm f4.5)

These Komura lenses, listed to the left of the heavy vertical line, fit directly on the camera body (200mm f4.5 requires reflex housing). These include lenses to fit rangefinder cameras with Leica thread mounts (Leica, Canon, Tower, Leotax, Nicca). They are designed to couple to the camera's rangefinder, and are supplied with an optical finder.

b. Lenses from 200mm f3.5 to 800mm f8 (does not include 200mm f4.5)

The five lenses listed to the right of the heavy vertical line use a unique interchangeable adapter mount system, which allows them to fit more than 30 different make single lens reflex cameras. The adapter required for each of these lenses is indicated by a 'letter' shown next to the lens product number in the guide. The letter is referenced to the actual number by which the adapter can be ordered, in a table below the lens guide.

These same lenses will also fit rangefinder cameras having Leica thread mounts, by means of a reflex housing.

2 — ORDERING AND STOCKING

The Komura lens guide facilitates 'ordering' and 'stocking'. At a glance, the Dealer can see which lenses a particular camera will accept, or the different cameras any one lens will fit. Since every Komura lens, its product number and the cameras it will fit, is listed, the guide also serves as an immediate reference in answering any consumer inquiry.

3 — HOW TO USE THE LENS GUIDE

Example: Your customer owns a Pentax camera and wishes to purchase a 135mm f3.5 Komura lens. By following the name of the camera (listed on the left side of the guide) across to the box under 135mm f3.5, you can immediately determine the correct lens number (LN30098).
